Mrs. Heithoff

## Classroom Activities

We have reached the end of the first trimester. Report cards will be in folders next Friday. I am glad assessing is over and that we can get back to small groups in reading and math. We will start our math unit about 3D shapes next week. There is a youtube video on the class website to help your child learn the names of the 3D shapes. In social studies we learned and talked about rules and laws. We discussed why they are important and

how they change depending on where we are. An example is we can run in PE and at recess, but we can't run in the classroom or in the halls.

Next week, we will begin a science unit exploring the structure and function of things. We will be designing beanstalks and maybe even a little pigs house before Thanksgiving break. We will have to see how good our listening is at the end of the day and how much we can get done.

## Books We Read

What's My Name? by Kathleen M. Fischer

Clang! Clang! Beep! Beep! Listen to the City by Robert Burleigh

## Letter Person News

Mr. N's noisy nose is always getting him into trouble. But he is a lot of fun. Our N puzzle went well and we are beginning to include longer words. We wrote nine, nest, and nut independently.

These are the boxes highlighted in yellow.

Thank you for taking the time to read the classroom books and return them the next day. I know there have been a lot of them traveling.

## Important Information & Celebrations
