

# Kindergarten News

Mrs. Heithoff

## Classroom Activities

We have still been working on making our numbers 0-10 the Kindergarten Way. We will complete 1 more book reviewing these numbers next week and then move on to teen numbers. We will also begin counting to 100 as part of our calendar time. We are going to draw a number between 0 and 100 and this will tell us where we begin counting. When you count

with your child at home, you don't always have to start at 1 either. Next week we will begin a science unit about force and motion. We will be exploring how things move and what happens if we push or pull something. I hope you have been enjoying our class books that have been traveling to homes. If you haven't gotten one yet, Hopefully you'll get one soon.

## Books We Read

Pointy Patches are for Me!

By Cathy Torrissi

The Handiest Things in the World by Andrew Clements

"Timimoto" a tale from Japan

## Letter Person News

Ms. P's Pointy patches come in many different colors. These pointy patches also help us prove whether or not words begin with the same sound.

We are working hard on including all the sounds of words in our writing.

Many of our activities at the beginning of the year focus on letter sounds and names. Both skills help your child learn to read and write. This weeks new sight words were a, up.
